

II. SPECIFICATION AMENDMENTS

1. Please replace the title as rewritten below:

- - STARTING A SESSION IN A SYNCHRONIZATION SYSTEM - -

2. Please replace paragraph [0032] as rewritten below:

[0032] Source URI of the Management Server (Source URI). The field contains the URI identifier of the server, ~~e.g.~~ In certain cases, this field can also be shortened by leaving out the protocol identifier, for instance, or, instead of the server address, transmitting only the shorter identifier in the field. Alternatively, the TASS field can be used for transmitting the server identifier.
